**EXAMINERS AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and /or additions by unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such amendment, it must be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Shun Yao (Reg. No. 59,242) on September 29, 2009.

3. The application has been amended as follows:

Claim 21 has been replaced with the following amended claim 21.

21. (Currently amended) An apparatus that facilitates dynamic delivery of service profiles to a client, comprising:

a device configured to provide a service;  
a memory within the device containing the service profile that enables clients to use the service provided by the device;

a discovery mechanism configured to perform a discovery operation that allows the client to discover new services on a network;

a profile transfer mechanism, wherein if a new service is discovered for which the client does not possess a service profile for the new service, the profile transfer mechanism is configured to cause the service profile to be transferred from a service provider of the new service to the client;

wherein causing the client to obtain the service profile involves:

causing the client to send a request for the service profile to the service provider of the new service, wherein the request includes type information identifying the type of device platform of the client; and

causing the service provider to select the service profile from a set of service profiles based on the received type information of the client; and

an installation mechanism configured to cause the service profile to be installed on the client to enable the client to use the new service,

wherein the service profile includes a specification that describes how to use the new service, and wherein the installation mechanism is configured to,

cause device-specific code to be generated to implement the specification, and

cause the code to be installed on the client; wherein the service profile is a dynamic extension profile, which provides commands that:

allow the client to query the service provider to determine which service profiles are available on the service provider; and

transfer the service profile from the service provider to the client.

### **REASONS FOR ALLOWANCE**

4. Claims 1-3, 5-13, 15-23, 25-32 re-numbered 1-29 are allowable over the prior art of record.

This communication warrants no examiner's reason for allowance, as applicant's reply makes evident the reason for allowance, satisfying the record as whole as required by rule 37 CFR 1.104 (e). In this case, the substance of applicant's remarks in the Amendment filed on August 13, 2009 with respect to the amended claim limitations point out the reason claims are patentable over the prior art of record. Thus, the reason for allowance is in all probability evident from the record and no statement for examiner's reason for allowance is necessary (see MPEP 13202.14).

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
